

Soham Reshamwala Backend Developer (PHP/Laravel)

sohamreshamwala0107@gmail.com +91-8320140437 Surat, Gujarat, India soham-reshamwala

SUMMARY

PHP Laravel Developer with 1+ years of experience building scalable web applications and secure RESTful APIs. Proficient in MVC architecture, Eloquent ORM, query optimization, and third-party integrations. Adept at handling large-scale data operations and implementing business logic seamlessly without interrupting live services. Dedicated to writing clean, maintainable code following SOLID principles and automated testing within Agile workflows.

PROFESSIONAL EXPERIENCE

- 07/2025 – Present
Surat, Gujarat

Bigscal Technologies Pvt. Ltd. , PHP - Laravel Developer
 - GUVNL Enterprise Utilities (DGVCL, MGVCL, PGVCL, UGVCL)** Solely managed backend and database operations for 4 state power DISCOMs, handling 100M+ (10-12 Crore) billing records. Engineered core engines to dynamically compute complex state tariffs and subsidies. Executed large-scale, zero-downtime legacy data migrations while optimizing SQL schemas and indexing to drastically lower peak-hour query latency.
- 01/2025 – 06/2025
Surat, Gujarat

Bigscal Technologies Pvt. Ltd. , Intern
 - Mastered MVC architecture and full-stack concepts, progressing from core PHP to Laravel framework development. Built advanced database logic using Oracle SQL and PL/SQL, including complex Joins, Stored Procedures, Triggers, and Functions. Monitored database health and optimized query performance via Oracle Enterprise Manager. Integrated Git and GitHub for collaborative version control while writing clean, high-performance server-side logic.

SKILLS

Backend PHP, Laravel , Eloquent ORM, MVC Architecture	Frontend HTML, CSS , JavaScript, Blade, Bootstrap, Tailwind CSS, JQuery, Ajax	Database/Caching MySQL, PostgreSQL, Redis, Oracle
API & Integration: RESTful APIs, JSON, Third-party API integrations (Payment gateways, etc.)	Tools & DevOps Git/GitHub, Docker (basic), Composer, Postman, Artisan CLI	Concepts OOP, SOLID Principles, Database Optimization, Authentication (Sanctum/Breeze)

LANGUAGES

English Gujarati
Hindi

PROJECTS

MedExplain AI, Intelligent RAG Medical Report Analyzer
Technologies: Laravel, PostgreSQL (pgvector), Python (FastAPI), Gemini API, Redis, Laravel Queues
Description: Engineered a secure RAG pipeline that processes medical PDFs/Images into semantic chunks, utilizing pgvector for cosine-similarity searches against medical references. Optimized document tokenization and external AI API execution via Laravel Queues and Redis to eliminate request timeouts. Implemented strict system prompts and JSON output constraints to deliver deterministic, easy-to-understand health explanations and medical disclaimers in user preferred language .
